

LEEDS POLICY STATEMENT

Juba Aluminum Products Company, Inc.
Policy Statement on Leadership in Energy and Environmental Design (LEED)

As a leader in the glass and glazing industry for new building construction, Juba Aluminum is dedicated to the global effort in the reduction of environmental pollutants. We share your same "conservation of energy" perspective by complying with and exceeding the recommendations provided by the U.S Green Building Council, LEED Program.

We partner with architects, owners, contractors, and suppliers in providing building skin materials that meet the goals of the LEED Program.

We are committed in doing our part in creating a healthier, more productive, and more efficient place to live and work.
