For Immediate Release:

Juba Aluminum Products Company Awarded 2011 Eagle Award

CONCORD, N.C. (October, 2011) - Juba Aluminum Products Company has been awarded the Eagle Award by The Associated Builders and Contractors of the Carolinas (ABC) for their quality workmanship on the RSA Judicial Center in Montgomery, Alabama.

"The RSA Project is 85 years of local history preserved in a most unique way", said Janna Juba Riley, President. The facade of this modern structure fully encapsulates the Alabama Supreme Court House building originally built in 1926. By creating a new structure extending around and above the existing Judicial Building, the design offers a seamless view of the historic Supreme Court House while keeping the state's history well preserved and discoverable for generations to come.

This project features 106,000 square feet of custom, high-performance, thermally improved curtainwall. The system was installed using both traditionally captured and structurally glazed methods. The panels installed featured both zinc and painted finishes, depending on the location, with each finish accenting a different aspect of the project. Panel systems highlighted penthouses, closures around skylights, soffits, vertical closures behind curtainwalls, parking deck ceilings, cooling towers and lobby entrances.

"Unquestionably, the focal feature of the project is the Grand Vestibule which features 6,500 square feet of point-supported all-glass walls. This main entrance feature gives you a glimpse into the past", said John Juba, CEO.

The Award will be presented at the *Tenth Annual Excellence In Construction Awards Banquet* on Thursday evening, November 17, 2011 at the Grandover Resort and Conference Center in Greensboro, North Carolina. Selections are based on projects that best exemplify the contributions of quality construction. The Excellence in Construction competition is a nationwide program that publicly recognizes quality and innovation in construction. Voting for the Eagle awards is by industry peers recognizing superiority in all areas including client satisfaction.

###

Juba Aluminum Products specializes in constructing high-performance building exteriors and storefronts. The company provides both standard and custom exterior systems consisting of aluminum curtainwalls, storefronts, granite walls, steel and aluminum panel walls and skylights.
